

AEROSOL CONTAINMENT TENT (ACT)

Portable Negative Pressure for Procedures

ABOUT THE ACT

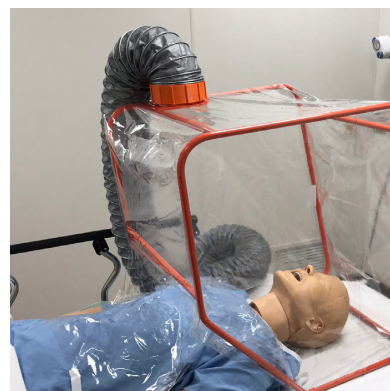

The ACT is the only portable negative pressure unit on the market that enables clinicians to perform procedures safely while the patient is contained under validated negative pressure. This enables containment of potentially infectious aerosols during Aerosol Generating Medical Procedures (AGMP). The ACT provides critical protection for clinicians conducting life-saving aerosol generating procedures on patients, such as Intubation/Extubation, High Flow O₂, BiPAP, CPAP, BVM Ventilation and CPR.

BENEFITS

- Increase safety during aerosol generating procedures
 - Intubation/Extubation, High Flow O₂, BiPAP, CPAP, and BVM Ventilation
- Increase negative pressure isolation capacity
- Safely expand non-invasive ventilation usage to avoid ICU admissions
- Enhanced flexibility in patient placement and temporary facilities
- Minimize risk of COVID-19 transmission during elective procedures
- Provide continuity of patient care by avoiding procedure delays and cancellations

PRODUCT SPECIFICATIONS

- 4 access ports for healthcare provider access
- Minimum -7.5 Pa pressure differential, meets CSA standards
- 99.97% efficiency HEPA filter
- Single-use disposal tent & duct
- Reusable frame and fan/filter unit
- Portable fan/filter on wheels
- Fits standard hospital beds and/or tables
